Kissling 340 Rebuild Seminar

A Unique Hands-on Training Opportunity!

~ Salt Lake City, UT

Don't miss out... reply today! Interest is high - but space is limited to 10 individuals!

August 7-10 Kissling 340 Gearbox Rebuild with Artec Machine Systems

Seminar Cost: \$550 per person

Class size limit: 10

Registration deadline: Monday, July 30, 2007

Join Doppelmayr CTEC and professionals from the Artec Machine Field Services team (authorized USA Kissling Service Center) for a unique hands-on experience in the disassembly and complete rebuild of a Kissling 340 gearbox! This will be a full-attendee participation exercise. Work along side the Doppelmayr CTEC & Artec Machine Field Services team to participate in the disassembly, evaluation, and the replacement of key components within the gearbox. Supplemental instruction on gearbox design & operation and predictive maintenance techniques will be offered throughout the seminar. Skills gained in this seminar are applicable to many types of gearboxes and will be an invaluable training opportunity to improve the "tool box" of any ski area Maintenance Technician! Participants skilled in advanced mechanical techniques should come prepared with work clothes or coveralls, safety footwear, and be fully prepared to get dirty & end the day tired and smelling like 90 weight gear oil!

The seminar will run from 8:00 AM ~ 4:00 PM Tuesday through Thursday and wrap up by 12:00 PM on Friday. The session will take place primarily within the Salt Lake City Doppelmayr CTEC Service Bay but additional training will be conducted in the Customer Service Training Center. Ample time for questions & answers will be available throughout the session.

Break refreshments & lunches will be provided daily.
